

# Partnership Programme

ISDA Create continues to expand rapidly, with over 450 institutions now onboarded.

Our users often work with advisors to help them make the most of the platform.

We are therefore delighted to launch a programme to recognise these key industry partners who help market participants with the efficient negotiation and execution of ISDA documents.

## Our programme

- Equips professional service firms with the **skills and knowledge** they need to draft, negotiate, and execute documents on their clients' behalf using ISDA Create. This means they can **hit the ground running** when instructed by their clients
- Gives banks and asset managers **visibility** of firms that are already familiar and knowledgeable about ISDA Create. These are firms they know they can **rely on** to use the platform on their behalf in an efficient way
- Creates a natural **feedback loop** back to the ISDA Create team so that we can continue to design feature enhancements and integrations that our users and their advisors will find most useful.

Working together, we can accelerate the adoption of technology to create greater efficiencies and reduce risk across the derivatives market.

All our partners have attended several interactive training sessions and have passed a qualification test in order to be certified as an ISDA Create Partner.

There are three certification tiers - Silver, Gold and Platinum - depending on their experience with using the platform.

We are pleased to launch the programme with industry leaders, including:

**Platinum**

**Gold**

**Silver**
